BREEDING: Where known

Where breeding is known, please provide positive proof of any breeding/pedigree for the above-named horse/pony. This can be in the form of a society issued covering certificate complete with a copy of the sire's pedigree if not CHAPS registered, and a copy of the mare's registration and pedigree. In the case of animals issued with a pedigree registration certificate (i.e. APHA(US)), then a copy should be forwarded to ensure pedigree insertion into the passport.

It is recommended that all foals should firstly be registered with the society which has issued the covering certificate (where one exists) so that the licence and pedigree can be confirmed and correctly inserted into the passport.

For DNA verification please apply to CHAPS (UK) Administration for a kit, giving your details, foal's name, D.O.B., Sire and dam and a cheque for £45.00. The kit will be sent out to you in order that the vet can take the sample at the same time as microchipping. Both kit and application form should then be returned to CHAPS Administration.
